INTERNSHIPS AND PROJECTS

Projects	<p>MESCOE Alumni Portal We design and develop website for our college. This for our college alumni. My role in this internship is to design web pages, make and handle database. We mainly use technology like Vanilla JavaScript, HTML, Bootstrap..</p> <p>My Portfolio I create portfolio to showcase my certification, my skills all about me my all project also there. I build website in React, Bootstrap etc..</p> <p>Calculator I create an web application Calculator using React. It is work with full functionality of keyboard. .</p> <p>Antakshari Game with Bot I created Antakshari game with bot using Python. In this game player can not win solo. Logic behind this game is to bot remember last letter on song where u loss & throw song which start from that letter only. Human can not remember that much so it is really hard to win. We can play this game on terminal for now..</p> <p>Snake and Ladder Game I made this game using C as well as Python. This is simple snake and ladder game, we can play it on terminal..</p> <p>Tic-Tac-Toe Tic-Tac-Toe is our favorite game made using Python. Simple game on terminal. .</p>
